Part B. SUMMARY OF CV

Pau Gorostiza graduated in physics at the University of Barcelona (UB), where he also obtained his PhD (European Doctorate) in the field of semiconductor electrochemistry. He also worked at the microscopy facility of the UB, where he gained experience in force microscopy and spectroscopy of biological samples, as well as in nanotechnology applied to materials science. He has visited the CNRS and the University Pierre and Marie Curie in Paris (France), and the University of California at Berkeley (USA), where he switched his research interests toward ion channel electrophysiology and chemical biology, specifically on photopharmacological manipulation of proteins for remotely controlling biological activity. He is currently ICREA Research Professor at the Institute for Bioengineering of Catalonia (IBEC), where he develops light regulated ligands of neuronal proteins, and studies electron transfer in redox proteins and photosynthetic complexes using EC-STM/AFM. He has published more than 120 articles in international peer-reviewed journals including Nature, Science, Nature Materials, Nature Chemistry, Nature Chemical Biology, Nature Communications, JACS, Angewandte Chemie and several highly cited review articles in optogenetics and photopharmacology. His publications (most belonging to the first decile of their respective fields) received more than 7420 citations and give an h-index of 46 (Scholar). In addition, he has given several invited lectures (including Heraeus Seminar on Electrochemical Surface Science, Lorenz Workshop on Optogenetics, Bunsen Discussion meeting / Gerischer-Kolb Symposium on Bioelectrochemistry, and Bioelectrochemical Society) and organized 8 international workshops. He has participated in more than 50 competitive research grants, and he is principal investigator of 6 Spanish grants (CTQ2008-06160, CTQ2008-03129-E/BQU and PET2006-0808, DEEP RED), 10 European grants (ERC-StG-2007-210355, ERC-2012-PoC-335011, FP7-ICT-2009-270483, FP7-2010-IRG-277182 and FP7-IIF-2008-235255, ERA-net SynBio, Human Brain Project, DEEPER H2020-ICT-36-2020-RIA-101016787, PHOTOTHERAPORT EIC-Pathfinder Open) and 6 private foundation grants (Fundación Cobos, RecerCaixa, Marató TV3, Ramón Areces, Fundaluce, CaixaHealth). They include a Career Development Award of the Human Frontier Science Program (HFSP), European Research Council (ERC) Starting and Proof of Concept Grants, and coordination of an European Innovation Council grant.
