### Part A. PERSONAL INFORMATION

First name *	Javier		
Family name *	Ramón Azcón		
Sex *	Male	Date of Birth *	28/09/1978
ID number Social Security, Passport *	46709928	Phone Number *	(+34) 934 039 735 - 39735
URL web	<a href="https://ibecbarcelona.eu/es/research-groups/biosensors-for-bioengineering/">https://ibecbarcelona.eu/es/research-groups/biosensors-for-bioengineering/</a>		
Email Address	jramon@ibecbarcelona.eu		
Researcher´s identification number	Open Researcher and Contributor ID (ORCID) *	0000-0002-3636-8013	
	Researcher ID	A-2439-2014	
	Scopus Author ID	14520678200	

\* Mandatory

#### A.1. Current position

Job Title	ICREA professor		
Starting date	April 2020		
Institution	Institute for Bioengineering of Catalonia (IBEC)		
Department/Center	Biosensors for Bioengineering (B4b)		
Country	Spain	Phone Number	(+34) 934 039 735 - 39735
Keywords	Use of biochemical, microbiological and biological tools; Biosensors; Electrochemistry; Potentiometric; Voltammetric; Nanotechnology; Flow techniques; Gas chromatography (fid, ecd, ms, etc); Liquid chromatography (uv, luminiscence, ms, electrochemical, etc); Sample screenings; Peptides and proteins; Enzymatic reactions; Total synthesis; Biomaterials; Cell culture; Tissue culture		

#### A.2. Previous positions

Period	Job Title / Name of Employer / Country
01-01-2017 now	Junior Group Leader Institute for Bioengineering of Catalonia (IBEC), Barcelona, Spain
01-01-2016 31-12-2019	Ramon y Cajal fellow Institute for Bioengineering of Catalonia (IBEC), Barcelona, Spain
01-04-2013 31-06-2014	Assistant Professor Advanced Institute of Materials Research (WPI-AIMR) Tohoku University, Sendai, Japan
01-03-2011 31-03-2013	Associate Researcher Advanced Institute of Materials Research (WPI-AIMR) Tohoku University, Sendai, Japan

01-04-2009 31-02-2011	JSPS Postdoctoral Research Fellow Graduate School of Material Science, University of Hyogo, Hyogo, Japan
--------------------------	--

### A.3. Education

Degree/Master/PhD	University / Country	Year
Ph.D. In Organic Chemistry	Universitat de Barcelona Spain	2008
M.S. In Biochemistry	Instituto de Química Avanzada de Cataluña (CSIC) Spain	2004
B.S. in Organic Chemistry	Universitat de Barcelona Spain	2002

### A.4. General quality indicators of scientific production

Professor Ramon has been occupying the role of Group Leader at the Institute of Bioengineering of Catalonia (IBEC) in Barcelona, Spain, since 2017. Since 2019, he has also been serving as an ICREA professor. Leading the "Biosensors for Bioengineering" group, Professor Ramon focuses on amalgamating sensor technology and nanotechnology with tissue engineering to advance the development of organs-on-a-chip (OOC) platforms. The team under his guidance consists of 18 members with diverse backgrounds, including industrial engineers, biotechnologists, and biologists. This group encompasses 1 senior researcher, 5 postdocs, 6 PhD students, 2 specialized technicians, 3 master's students, and 1 visiting researcher.

One noteworthy project led by Professor Ramon is the ERC starting grant project "DAMOC." This initiative aims to overcome limitations in the OOC field using a revolutionary technological approach, concentrating on engineering tissues in a multi-organ-on-a-chip platform to mimic the physiological characteristics of in vivo tissues. Another significant project, "TATAMI," funded by Fundación Bancaria "La Caixa" – CaixaHealth program, focuses on developing biomedical models for muscular dystrophies to comprehend molecular pathogenesis, identify therapeutic targets, and discover drugs for these rare and incurable diseases. In total during the period comprise within 2019 and 2023 more than 5 million of euros has been obtained from private and public sources.

Professor Ramon has established national and international collaborations with researchers, clinicians, and companies throughout his career. He secured competitive funding from the Medical Research Council (UK) to study Duchenne's rare disease. Collaborating closely with clinical groups and hospitals such as Hospital de Sant Pau (Barcelona) and Instituto de Investigaciones Clínicas de Valencia (INCLIVA), he and his team develop human microtissues to study the myasthenia gravis neuromuscular rare disease.

In alignment with the translational nature of his research, Professor Ramon is actively involved as the entrepreneurial scientist in a valorization project financed by Producte Call (AGAUR) to bring plasmonic biosensors for Myasthenia Gravis diagnosis to the market. Collaborating with patient associations like "Duchenne Parent Project" and "Asociación Conquistando Escalones," as well as national and international companies, including Arthex biotech, SOM biotech, BI/OND (The Netherlands), and BioEmTech (Greece), Professor Ramon has also initiated collaborations with industry leaders such as Grifols (Spain), Multivawe (Switzerland), Oxford Instrument (UK), and NovoNordisk (Denmark) to develop new technologies with a high impact on clinical diagnosis and drug development. Additionally, Professor Ramon is a co-founder of a spin-off company, Vitala.

He is dedicated to disseminating scientific advances to society by participating in talks organized by patient associations and various activities aimed at high school and undergraduate students. Professor Ramon holds institutional responsibilities as a board member of the Working Committee for The Human Resources Strategy for Researchers (HRS4R) at IBEC. Furthermore, he is a member of the Fellowship Committee and the Symposium Committee at IBEC. Professor Ramon is also responsible for organizing the EUROOCS 2024 conference in Milan and the TERMIS 2026 in Mallorca.

Lastly, Professor Ramon actively contributes as an ad hoc reviewer in high-impact journals such as Biofabrication, Acta Biomaterialia, International Journal of Molecular Sciences, and Journal of Clinical Medicine. As a topical advisory board member at the Biology Journal, he co-organizes the Special Issue: "Clinical Application for Tissue Engineering" as Guest Editor in Biomedicines. Additionally, Professor Ramon is an Editorial Board Member of In Vitro Model Journal (Springer Nature) and an Associate Editor of Analytical Sciences (Japan Society for Analytical Science, Japan). He authorises 108 publications, including scientific manuscripts, book chapters, and full books. Moreover, Professor Ramon serves as an external reviewer for the Exploration competition of the New Frontiers in Research Fund, Canada Research Coordinating Committee (CRCC), Canada; grants Prinses Beatrix Spierfonds, Netherlands; National Science Center, Poland; and various national grants, including Torres Quevedo, Ramon y Cajal, FIS Health Research Projects, and Projects Challenges Research.

### Section C. MOST RELEVANT MERITS

Documents: 108      Citations: 3358 total citations    h-index: 31  
Co-authors: 176      Subject area: Tissue Engineering, Chemistry, Biosensors, Biomaterials

### C.2. Conferences form 2022

1. Organ on a chip models to emulate multi systemic metabolic diseases. Symposium on natural drugs development. Masaryk University Faculty of Pharmacy. 2023. Czech Republic.
2. Training-on-a-Chip: a multi-organ device to study the effect of muscle exercise on insulin secretion in vitro. TERMIS-EU 2023, Manchester, UK
3. Organization of scientific activity: First conference in bioengineering for Neuromuscular Diseases, IBEC, 2022, Barcelona, Spain
4. Functional 3D skeletal muscle model of Duchenne muscular dystrophy that reproduces disease phenotypes and evaluates potential therapeutic compounds. World Muscle Society. World Muscle Society. 2022. Canada.
5. Preparación de «Músculo en un Chip» para el estudio de la DMD. Congreso International Duchenne Parent Project España. Duchenne Parent Project España. 2022. Spain.
6. Training-on-a-Chip: a multi-organ device to study the effect of muscle exercise on insulin secretion in vitro. EUROoCs. EUROoCs. 2022. France.

### C.3. Participation in R&D and Innovation projects from 2019

Project title	Funding source	Amount (Euros)	Period	Role of the PI
<b>Diabetes Approach by Multi-Organ-on-a-Chip (DAMOC)</b>	ERC starting grant project – 714317 (European Commission)	1.500.000	2017 – 2021	Principal investigator
<b>FAP-DMD: Elucidating the role of FAP cells in the process of muscle degeneration in patients with Duchenne muscular dystrophy</b>	Medical Research Council (United Kingdom) MR/W019086/1	1.165.061,85	2022 – 2024	Partner
<b>Benchtop NMR for Lab-on-chip (BLOC)</b>	FET open project – 863037 (European Commission)	900.000	2020 – 2023	Principal investigator
<b>Unlocking data content of Organ-On-Chips (UNLOOC)</b>	European Commission (Key Digital Technologies Joint Undertaking, KDT-JU-2023-1-IA - Topic 1 Global call according to SRIA 2023 (IA), Ref. 101140192)	588.000	2024 – 2027	PI - Partner
<b>Bone Marrow-on-Chip as smart sensor of lung cancer relapse (BuonMarrow)</b>	European Commission (EIC Pathfinder Open 2023, Ref. 101130604)	694.470	2024 – 2027	PI - Partner

<b>Origami Paper-based technology for the innovative and sustainable Organ-on-Chip devices (Phoenix)</b>	European Commission (EIC Pathfinder Open 2023, Ref. 101130395)	498.238	2024 – 2027	PI - Partner
<b>Integrated nano-photonics OMICs bio-SENSOR for lung cancer (OMICSENS)</b>	Pathfinder Open programme – (European Commission)	398.238	2024 – 2027	PI - Partner
